

# TELEPRIMARY CARE CERTIFICATE PROGRAM

This online certificate program will engage the primary care professional in a focused curriculum that gives best practices from highly regarded experts in the field. Telehealth will become an increasingly essential modality of care delivery across the spectrum of primary care. Consideration for how telehealth can support existing objectives for a primary care practice are important to determining how best to use this technology in providing effective and efficient care.

## Course includes:

- Introduction, Barriers and Opportunity of Teleprimary Care
- Operations, Workflow and Productivity in Ambulatory Setting
- Legal, Regulatory and Ethical Considerations
- Telepresence
- Clinical Application, Physical Examination and Documentation via a Remote Medium
